Motivated BCA graduate with hands-on experience in full-stack web development using React, JavaScript, HTML, and CSS. Demonstrated ability to build responsive, component-based applications with strong UI/UX focus. Actively seeking a software developer or frontend developer role to apply and expand technical skills in a dynamic environment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Tailwind CSS

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools

Core Concepts: Responsive Web Design, Component-Based Architecture, DOM Manipulation, REST APIs, UI/UX Principles

PROJECTS

Dynamic Image Gallery — React.js

- Developed a reusable component-based image gallery UI using React, improving code maintainability and reusability.
- Rendered dynamic content efficiently using `map()` and props, enabling scalable data-driven rendering.
- Implemented fully responsive design across multiple screen sizes using CSS Flexbox and media queries.
- Applied clean code principles and modular component structure to ensure readability and scalability.

Personal Portfolio Website — React.js, Tailwind CSS

- Built a modern, fully responsive portfolio website using React and Tailwind CSS to showcase projects and skills.
- Designed smooth scrolling navigation and optimised layout for desktop and mobile viewports.
- Integrated project cards, skills section, and contact form with focus on UI/UX and page performance.
- Achieved fast load times through code splitting, lazy loading, and performance optimisation techniques.

Food Ordering Web App — JavaScript, HTML5, CSS3

- Created an interactive food ordering UI with functional cart — add, remove, and quantity management.
- Implemented dynamic DOM manipulation and event handling for real-time product listing updates.
- Managed product state and cart logic using vanilla JavaScript without external dependencies.
- Designed a mobile-friendly, responsive layout ensuring consistent experience across devices.
